A MUST-HAVE QUESTION IN PAPER 1
TIPS

WHOLE NUMBERS

WE ALL KNOW THAT ONE MILLION IS A BIG NUMBER

BUT IN EXAM, MANY OF YOU FORGET HOW MANY DIGIT IT CONTAINS

JUST REMEMBER THIS:

1 0 0 0 0 0 0 0

THERE ARE 7 LETTERS IN THE WORD MILLION,
THEREFORE; THERE ARE 7 DIGITS IN A MILLION!
20 students attended a UPSR seminar.

How many students fell asleep during the seminar?

Students that fell asleep = \( \frac{5}{100} \times 20 \) students

= 1 student

FACT
50% of UPSR questions are set based on diagrams.

PRACTISE MORE QUESTIONS WITH DIAGRAMS

ALWAYS READ THE QUESTION FIRST TO LOOK FOR THE MAIN INFO BEFORE YOU READ THE DATA GIVEN IN THE DIAGRAM!

ALWAYS!!!
Its bow and arrow is $\frac{1}{4}$ times the cupid.

Find the total mass of both the cupid and the bow and arrow, in g.

1st step: Change 24 kg into 24000 g

Therefore; Cupid = 24000 g

2nd step: Find the mass of bow & arrow

Bow & arrow = $\frac{1}{4} \times 24000$ g

6000 g

Total = 24000 g + 6000 g

= 30000 g
TIPS

Always change mixed numbers into improper fractions before you proceed to calculate them to avoid making mistakes.

Even though the fractions can be added easily, but you might make mistakes if you don’t change them into improper fractions!

\[
\begin{align*}
1 \frac{1}{4} + 2 \frac{1}{8} + 1 \frac{1}{2} &= \frac{5}{4} + \frac{1}{8} + \frac{3}{2} \\
&= \frac{10}{8} + \frac{17}{8} + \frac{12}{8} \\
&= \frac{3}{9} \text{ or } \frac{7}{48}
\end{align*}
\]
